

Sehaat Saathi Meeting Agenda

Your Health Partner

Made with GAMMA

Sehaat Saathi

India's 1st AI-Powered Virtual Healthcare Platform

The right doctor, at the right time. Any Time. Any Where. Doctor is Here — always by your side.

Sehaat Saathi is Designed for Remote Video consultations, emergency healthcare, and personalized treatment. It provides AI-based symptom checking, instant diagnosis, and medicine suggestions.

Sehaat Saathi makes it easy to find a good doctor, book an appointment, check your health, order medicines, and get emergency help — all from your phone, any time of the day. We are here for every family in Bharat. 🌿

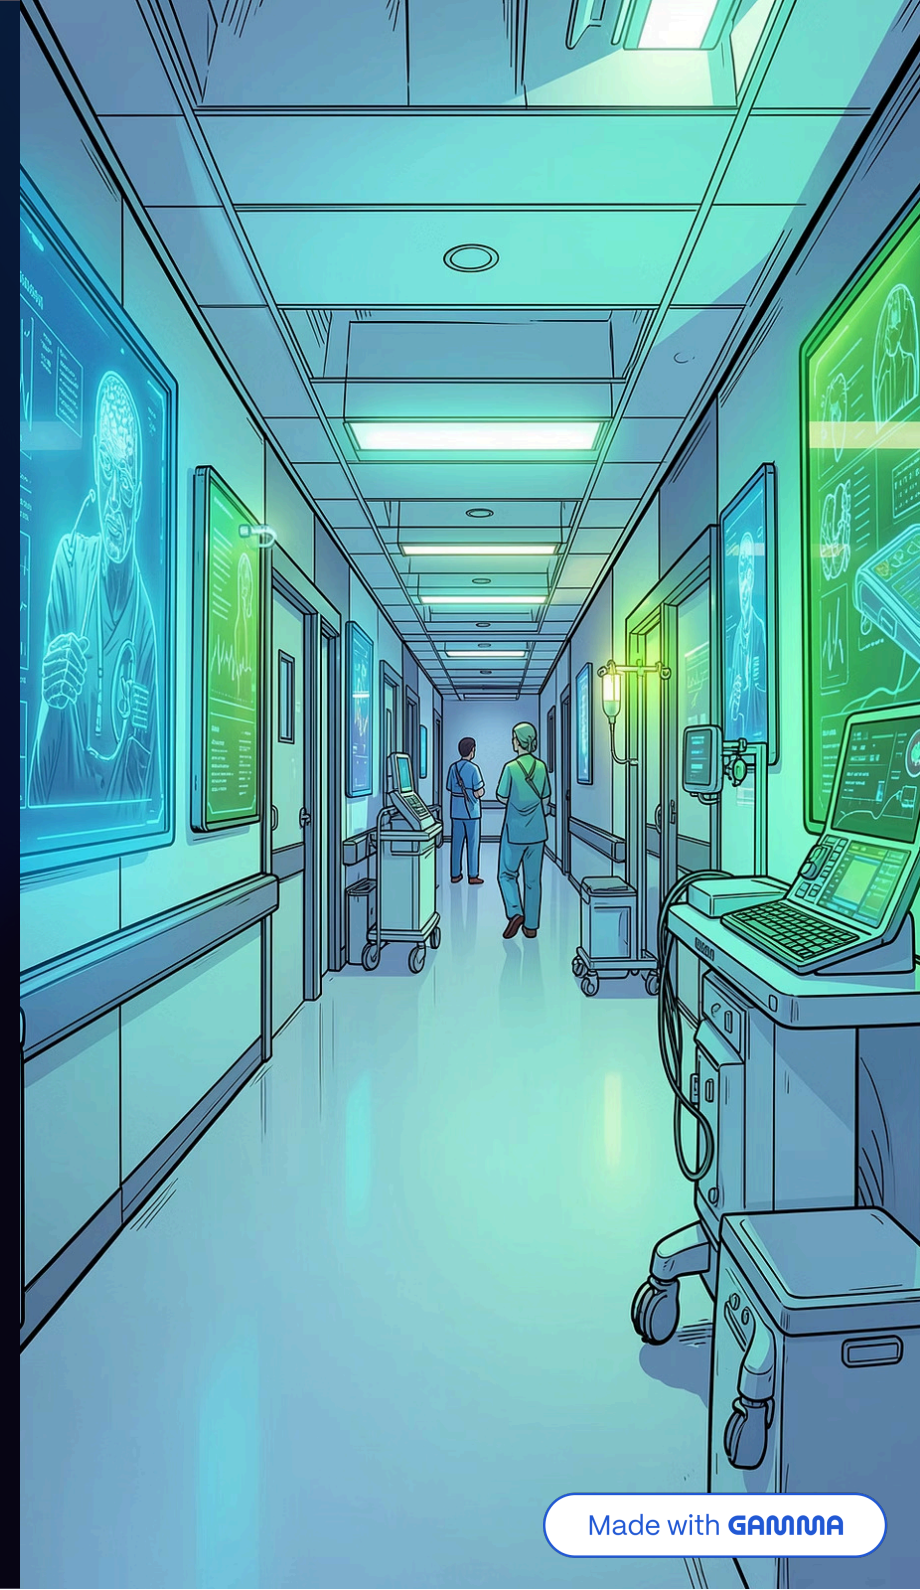

Our goal is not just to build another healthcare website. Our goal is to solve real healthcare problems for real people. We'll start small in Madhubani and Darbhanga, learn from users, improve continuously, and then scale step by step. If we stay consistent, we can build a product that people genuinely trust. Let's focus on execution, quality, and teamwork.

Building the Future of AI-Powered Healthcare

Sehaat Saathi is an AI-powered healthcare platform bridging the gap between patients and quality medical care across India.

- **Vision:** Make quality healthcare accessible to every Indian, everywhere.
- **Mission:** AI-powered platform connecting patients, doctors, and hospitals seamlessly.
- **Why We Exist:** Rural India faces doctor shortages, long wait times, and no digital access.
- **Long-Term Dream:** Become India's most trusted grassroots healthcare platform.

"Healthcare is not a privilege — it is a right. Sehaat Saathi exists to make that right a reality."

Current Product Status

Core modules are built and ready. One critical feature remains before launch.

✓ COMPLETED

Website Prototype

UI/UX ready for launch

AI Doctor Chatbot

Initial symptom assessment

Authentication

Secure login & registration

Doctor Module

Profiles, availability & management

Hospital Module

Institution listings & info

Appointment Booking

Scheduling & reminders

Admin Dashboard

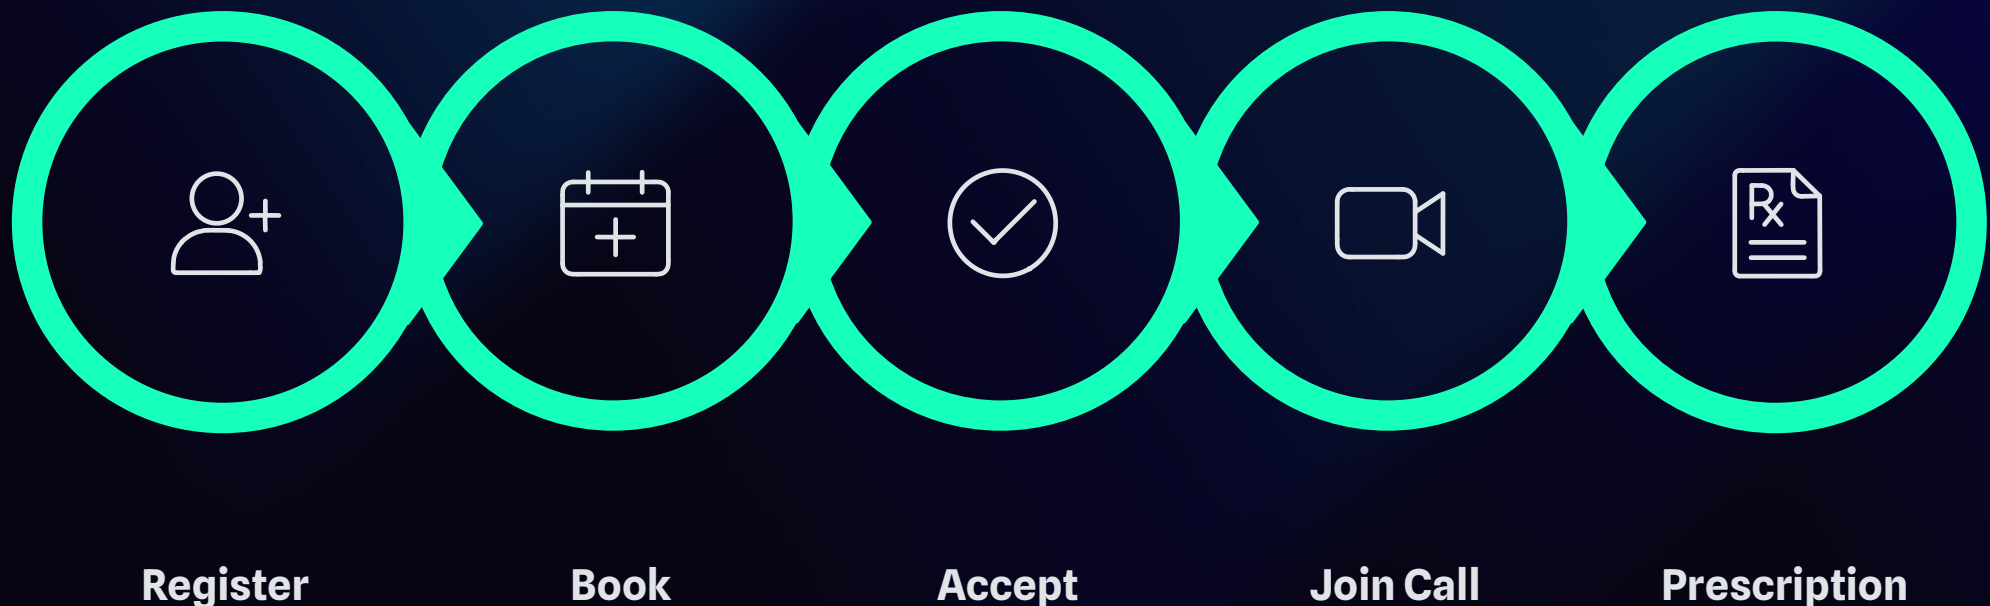

Platform oversight & analytics

Pending: Online Video Consultation — highest priority before launch.

Current Priority: Online Doctor Video Consultation

Video consultation is the highest-priority feature — it transforms Sehaat Saathi from a booking tool into a complete telemedicine platform.

End-to-end digital care — from first contact to follow-up — without leaving home.

Accessibility

Rural patients consult doctors remotely

Speed

Reduced wait times, faster care

Continuity

Digital prescriptions & follow-up records

MVP Strategy

Launch lean. Validate fast. Iterate continuously. Only essential features make the first release.

🎯 MVP Launch Features

➔ User Login

Secure patient authentication

➔ Doctor Login

Verified practitioner access

➔ AI Doctor

Initial symptom guidance

➔ Appointment Booking

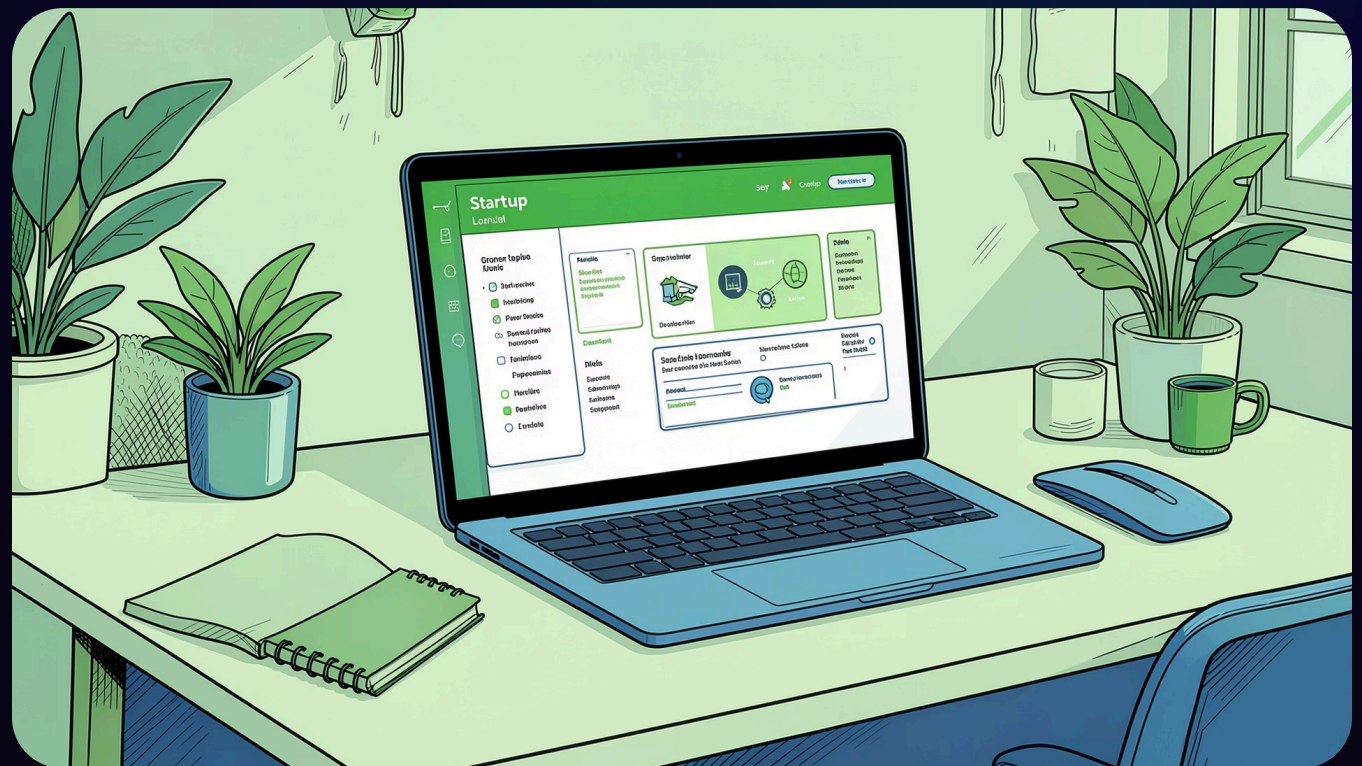

Schedule & manage visits

➔ Video Consultation

Live doctor-patient calls

➔ Feedback Collection

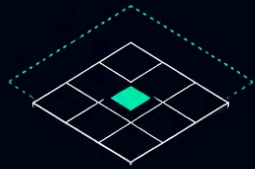

Post-visit ratings & insights

📌 **Why wait on other features?** Non-essential features add complexity, delay launch, and dilute focus. Validate the core value proposition first.

Local Market Launch Strategy

Begin in **Madhubani** and **Darbhanga** — controlled, low-risk environments ideal for rapid learning.

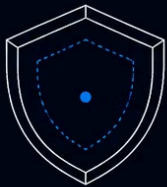

Small Market

(manageable user base,
focused geography)

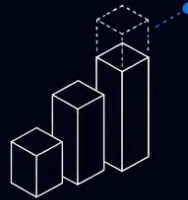

Easy Testing

(rapid iteration,
direct feedback)

Lower Risk

(contained operational
exposure)

Fast Improvement

(quick bug fixes,
product refinement)

Why Madhubani & Darbhanga?

- Underserved healthcare market with high demand
- Manageable geography for hands-on operations
- Fast feedback loops from real users
- Lower operational and financial risk
- Proven model before scaling to North Bihar

Product Validation Strategy

A structured validation cycle ensures every release is stable, trusted, and market-ready.

Internal Testing
Core team validates all flows

Real Launch
Go live with confidence

Bug Fixing
Resolve issues before launch

Friends & Family

Trusted circle provides honest feedback

Local Doctors

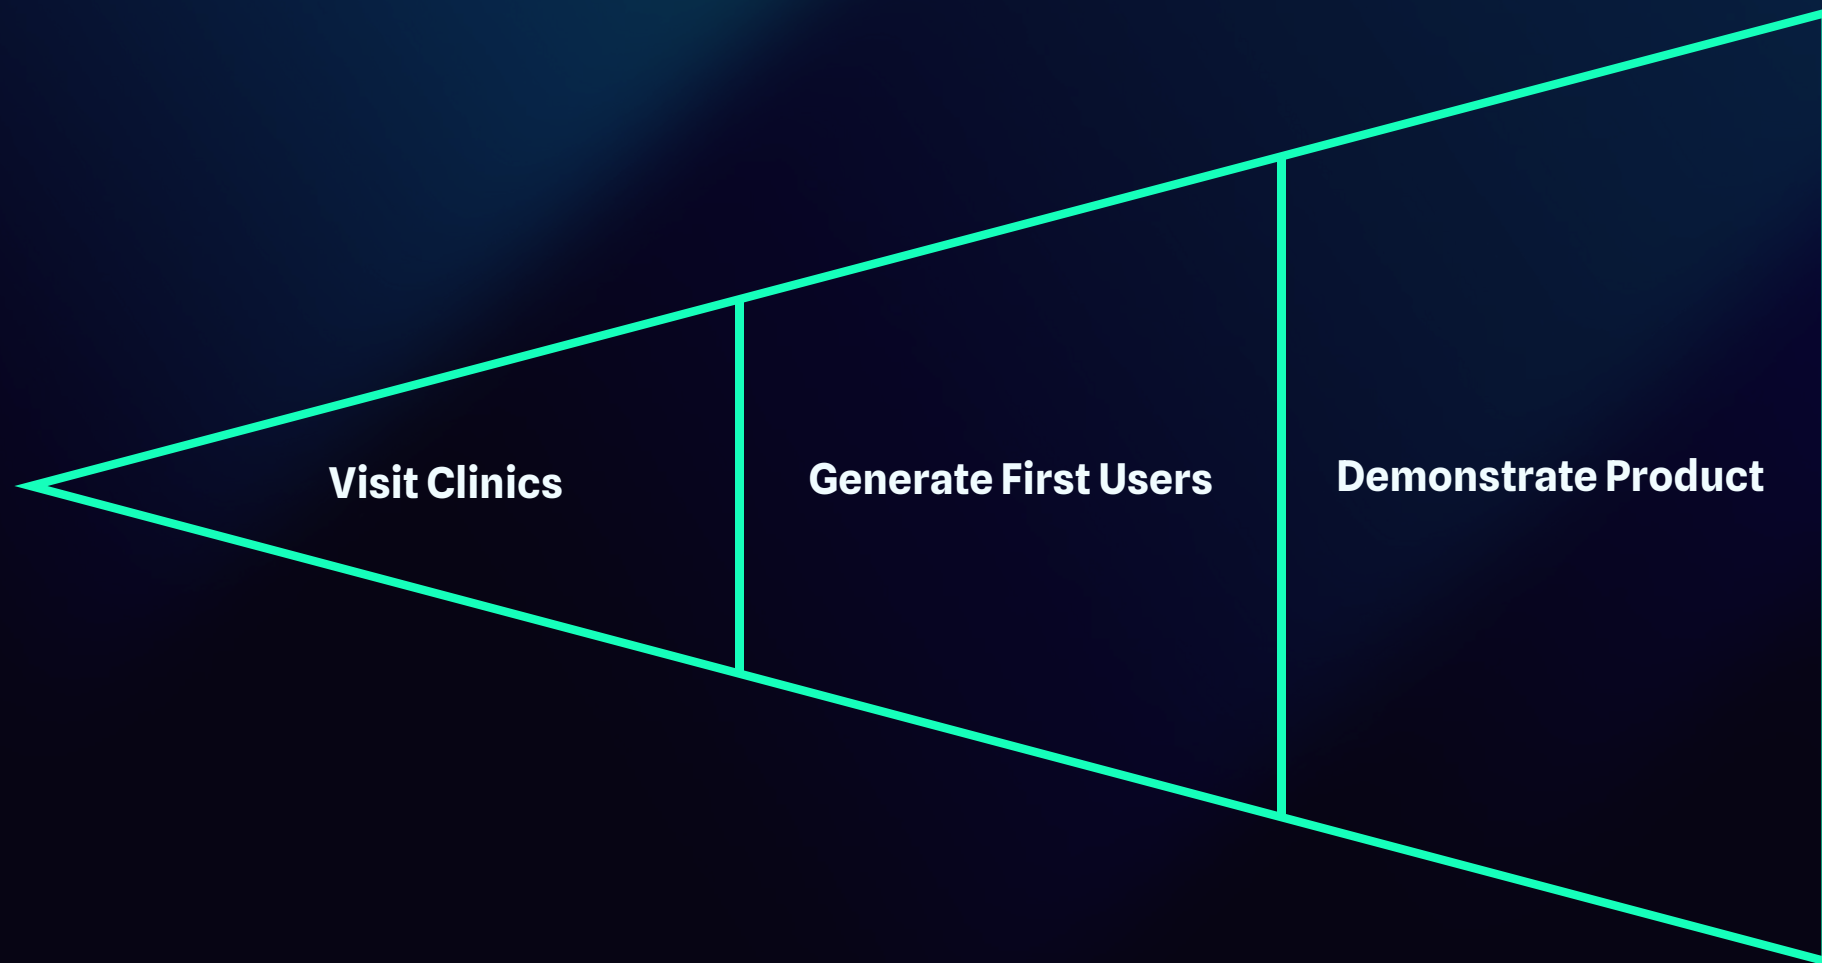

Clinical workflow validation

Selected Patients

Real-world usage testing

Doctor Onboarding Strategy

Trust is earned in person. Our onboarding approach is personal, respectful, and iterative.

Each step builds credibility and converts sceptical practitioners into active platform partners.

Visit Clinics

Face-to-face outreach builds trust that digital cannot replicate.

Demonstrate & Listen

Show the product live. Collect candid feedback from doctors.

Improve & Convert

Act on feedback quickly. Turn early adopters into champions.

Team Responsibilities

Clear ownership across three roles ensures accountability and speed.

Role	Primary Responsibilities	Key Deliverables
Founder	Product Vision, Healthcare Research, Marketing, Testing, Product Management	Strategy, Partnerships, Go-To-Market
Full Stack Developer	Frontend, Backend, Database, API, Video Consultation, GitHub	Product Build, Code Quality, Deployment
Senior Technical Advisor	Architecture Review, Scalability, Security, Product Guidance	Technical Oversight, Risk Mitigation

 Weekly syncs ensure alignment. Blockers escalated within 24 hours.

Scaling Roadmap

Growth is gradual and feedback-driven. Each phase is validated before the next begins.

Scaling pace is determined by user feedback, product maturity, and operational readiness — not arbitrary timelines.

Action Plan & Next Milestones

The next 90 days define our foundation. Every week has a clear deliverable.

"Start Small. Learn Fast. Improve Continuously. Scale Responsibly."

Together, let's build **Sehaat Saathi** into a trusted AI-powered healthcare platform that positively impacts **millions of lives** across India.
