Sehaat Saathi

सेहात साथी — Your Health Partner, Always With You

India's first unified AI-powered Rural & Semi-Urban (Bharat) Healthcare Ecosystem — connecting patients, doctors, hospitals, pharmacies and emergency services.

PITCH DECK PREPARED FOR

Chandigarh University Technology Business Incubator (CU-TBI)

The Elevator Pitch

Sehaat Saathi bridges the critical gap between patients, local doctors, hospitals, pharmacies and emergency services across Tier-2/3 and rural India — combining zero-queue OPD passes, instant tele-consults, rapid ambulance dispatch, AI multilingual diagnostics, and a non-profit blood network into one platform.

Bihar → Punjab → Haryana → UP corridor: 450M+ non-metro citizens underserved by metro-first healthcare apps.

The Bharat Healthcare Crisis

Massive OPD Queue Overcrowding

30–70 km travel + 2–4 hr physical queues just for an OPD slip.

Telehealth Friction

Rural families lack specialist access; metro apps ignore vernacular languages.

Emergency Ambulance Delays

No real-time GPS visibility — fatal delays in the critical Golden Hour.

Blood Bank Scarcity

Families run pillar to post; black-marketing of rare blood & platelets.

Crippling Medicine Costs

Chronic patients spend up to 40% of monthly income on branded drugs.

450M+ people across Tier-2/3 & rural India face this crisis daily.

BUILT FROM THE GROUND UP

Not a Boardroom Idea — A Ground-Zero Solution

Before writing a single line of code, our founder personally visited local doctors, clinics and hospitals on the ground to live the problem — not assume it.

On-the-Ground Discovery

Direct doctor & hospital visits across Madhubani to observe real OPD queues, patient friction and emergency gaps first-hand.

50+ Doctors Onboard

50+ practicing doctors in the founder's hometown of Madhubani, Bihar are already committed and ready to use Sehaat Saathi.

Problem-First Design

Every one of the 7 platform pillars was shaped directly by what patients and doctors said they needed — not guessed.

7 Core Innovation Pillars — Part I

01

Offline Doctor OPD Token Hub

Instant digital queue pass for Sadar & private hospitals — zero waiting time, saves 2–4 hrs per visit.

02

Instant Online Video Consult

5-minute video connect with verified doctors via WhatsApp/Meet + digital e-prescriptions.

03

24/7 Rapid Ambulance Booking

2-minute GPS dispatch network for BLS, ALS & Portable ICU Ventilator ambulances.

04

Emergency Blood Bank Hub

100% free, non-profit network connecting all 8 blood groups, SDP/RDP platelets & rare donors.

7 Core Innovation Pillars — Part II

AI Doctor Multilingual Chatbot

24/7 conversational triage in Hindi, Maithili, Bhojpuri & English for preliminary symptom screening.

Pharmacy Hub & Price Compare

Direct branded vs. generic medicine comparison — saving up to 70% on prescription costs.

Real-Time ICU Bed & Oxygen Tracker

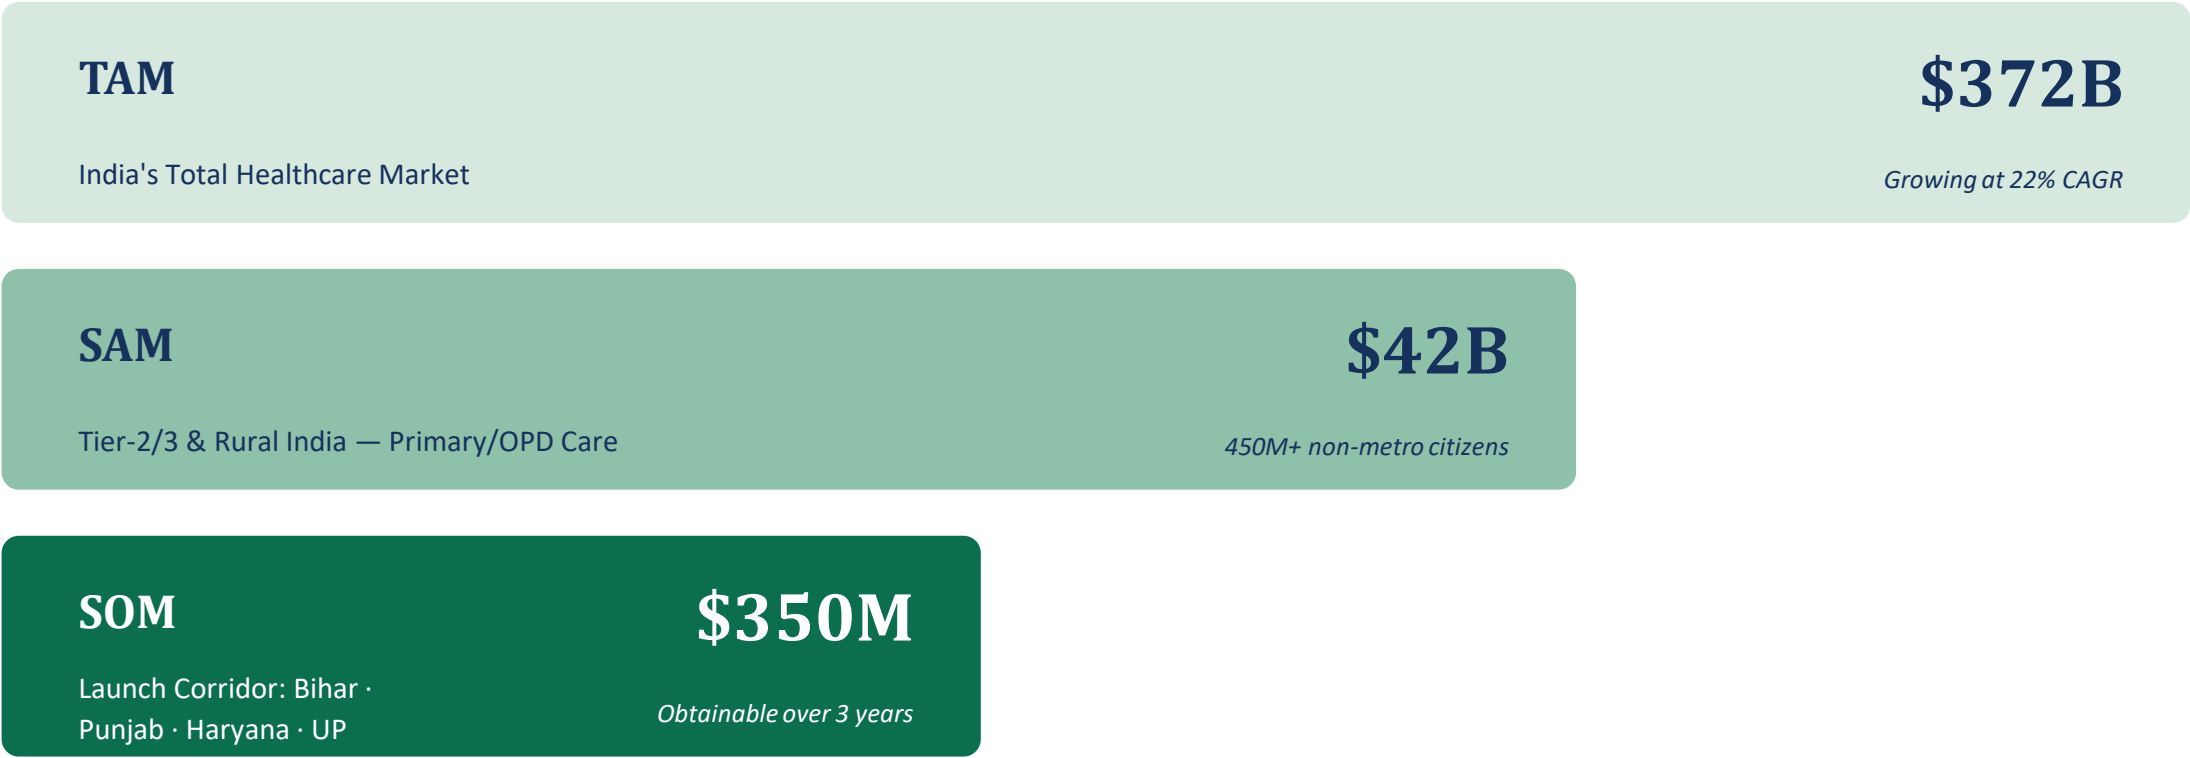

Live availability dashboard for ICU beds, ventilators & oxygen concentrators across districts.

50+ Doctors in Madhubani, Bihar Are Ready — already committed to onboard as our launch network the day we go live.

MARKET OPPORTUNITY

TAM · SAM · SOM

India’s Bharat healthcare demand is outpacing metro-first digital health supply — Sehaat Saathi is built for that gap from day one.

Monetization & Social Impact

B2B Hospital SaaS / Command Center

OPD tokens, doctor rosters & patient-flow management for clinics & hospitals.

₹1,999–₹7,999/mo

Micro-Convenience Fee

Nominal charge per confirmed instant OPD priority pass.

₹10–₹20 / pass

Teleconsultation Commission

Revenue share on paid specialist video consultations.

15% share

Pharmacy & Diagnostics Marketplace

Fulfillment affiliate fee on medicine savings & home blood tests.

5–10% fee

Non-Profit Blood Network — maintained 100% free as our core social-impact (ESG) commitment.

Technology Stack & IP Advantage

Frontend

- React 18 + TailwindCSS
- PWA — zero app-store friction
- Razorpay Web Checkout SDK

Backend

- Node.js + Express.js
- MongoDB Atlas (50-conn pool)
- Redis caching

Real-Time Engine

- Socket.IO
- Sub-second ambulance GPS pings
- Live OPD token displays

AI Engine

- Dual-layer hybrid triage
- Neural rule-based logic
- Localized LLM prompts for vernacular

Security

- 256-bit SSL encryption
- HIPAA-compliant data protocols
- HMAC-SHA256 payment verification

Current Traction & Milestones

Full Functional MVP

Production-ready web app deployed and running with sub-second latency.

38-District Matrix

Micro-locality mapping & doctor directory ready across Bihar and North Indian corridors.

Payment Integration

Razorpay Standard Checkout tested and verified for seamless digital payments.

SEO Dominance

Deep Schema.org JSON-LD Knowledge Graph and voice-search indexing live.

50+ Doctors Committed

Founder-recruited doctor network in Madhubani ready to go live on day one.

Ground-Validated Design

Every feature shaped by direct doctor & hospital field visits, not assumptions.

Why CU-TBI & What We Seek

01

Incubation & Co-Working

Access to CU-TBI mentorship, startup advisory & healthcare industry connections.

02

Pilot in Punjab & Tricity

Launch hospital OPD token pilots with Chandigarh/Mohali hospitals & rural health centers.

03

Grant & Seed Funding

Support applying to Startup India (SISFS), MeitY TIDE 2.0, and BIRAC BioNEST.

04

Academic & Research Synergy

Collaboration with CU's Medical, AI/CSE & Biotechnology departments for clinical validation.

Founder & Contact

Abhishek Kumar

Founder & CEO

- AI/ML Engineer, Multiple Startup Founder & Entrepreneur
- Founder of TechSeva IT Solutions (Custom AI & Software Engineering Agency)
- Led ground-zero field research across Madhubani hospitals before building
- 50+ doctors already committed to the platform pre-launch
